Connections of the Past Made to Last

Calvin Center Introduces Alumni Coordinator

A place of tradition. A place of connections. A place of memories. Calvin Center is a powerful place, special to many folks for many different reasons. One group of folks that this is especially true for is the staff alumni of Calvin Center. Memories flood back to former counselors when they remember the summer (or perhaps summers) they worked to change the lives of campers.

In celebration of their hard work and shared joy, Calvin Center is working to develop a staff alumni network. Headed up by Katie Godfrey (why, yes, she is in fact summer staff alumni), this development has three main goals: to keep alumni connected with current happenings, to honor the past and

In celebration of their hard work and shared joy, Calvin Center is working to develop a staff alumni network.

recognize how the efforts of previous years continue to impact Calvin Center, and to work together towards future success.

Godfrey is quick to point out that this network is for more than just the former summer staff of Calvin Center. It's for Team Challenge facilitators, Common Soul/Sole participants, office personnel, retreat planners- anyone who has devoted their hard work to Calvin Center in the past.

Would you like to get involved? Please email Katie Godfrey for more information (katie@calvincenter.org). Katie warmly welcomes your contributions of ideas and memories.

Thawing Out for Great Opportunities

Calvin Center Gears Up for Spring

The Calvin Center's 548 acres are about to shake off the cold, ice and snow and explode into warm beautiful springtime (the Groundhog said so!). This means that the trees will bud, the lake will begin to wake up with fish, tadpoles, dragonflies and the woods...ahh the woods! The woods will be alive with animals and birds and insects. There's no better way to celebrate the beauty of God's creation than to get out in it and smell it, touch it, listen to it, feel it and even taste it.

The Calvin Environmental Leadership Program (CELP) is a great way to help children do all of that while learning about science, too. CELP lessons are based on GA Curriculum Standards for Science, Math, and PE and can be tailored to fit your students' needs (including special needs or gifted students).

Learn more about CELP online.
